Asset Management

Your ally on the financial markets

"When grit meets grace and power embraces passion"

www.bullcambfx.com

Genesis

BullCambFx Asset Management has been founded from a common desire of a few traders, wishing to offer their expertise and the best tools from banks and financial institutions, to private and institutional clients.

BullCambFx Asset Management is composed of a young and dynamic team, speaking five different languages (English, French, German, Spanish, Portuguese). Thanks to their academic education in Europe and in the United States, due to their past professional experiences and establishing their business model in a worthy ethic, the founders have:

- Gathered the best research tools,
- Developed a unique risk management policy,
- Established a transparent management policy.

BullCambFx Asset Management manages, from its sole office based in Switzerland, the assets of clients who are amateurs in unique financial products with very high potential. BullCambFx Asset Management meets the special requirements of its clients by focusing on markets' niches, offering the proprietary trading activity on the foreign exchange, precious metals and commodities markets. The proprietary trading is a highly specialized activity, which is generally opened to a certain class of customer, picked up at the entry.

Our first objective is also yours: generate profits through the perpetual movements of financial markets.

Our management

BullCambFx Asset Management manage investments to realize gains upwards and downwards.

We offer several proprietary trading management models, to diversify your portfolios. They suit to all investor's profiles. Below are listed our main models:

Marché des changes
